EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in the Response to Restriction Requirement filed by Lawrence E. Ashery on April 29, 2002, where an election without traverse of claims 1-3, 12, 13, and 19 was made.

2. The application has been amended as follows: Please cancel non-elected claims 4-11, and 14-18.

Allowable Subject Matter

3. Claims 1-3, 12, 13, and 19 are allowed.
4. The following is an examiner's statement of reasons for allowance.

Katakura clearly teaches the construction of motor comprising:

- a rotor;
- a stator assembly facing said rotor;
- a motor base including;
 - a base section;
 - a bearing supporter for supporting a bearing vertically with respect to said base section;
 - a stator supporter, substantially concentric with said bearing supporter, for being mounted with said stator assembly,

wherein said bearing supporter is unitarily formed with said stator supporter, and

further comprising a stator stopper protrudently provided on said base section, wherein an inner wall of said stator assembly is fit on an outer wall of said stator supporter, and said stator stopper closely faces a lower end face of an outer wall of said stator assembly in an axial direction.

Fukuda et al. teach the construction of a brushless motor and its assembly method having metal terminals disposed radially around a bearing supporter substantially parallel a bottom face of a base section for the purpose of providing a brushless motor that can be simultaneously re-flow-soldered to a substrate and efficiently and densely mounted thereon in such a way that the coupled portion between the motor and the substrate has a high impact resistance.

The prior art of record, taken alone or in combination, fails to teach the construction of a motor as described on independent claims 1, 12, 13, and 19, wherein the metal terminal includes a buried section being buried within, and extending parallel to, the base section.

Dependent claims 2 and 3 are considered allowable by their dependence on allowed independent claim 1.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. See PTO-892.
